Question	Answer	
1) What is ADO.NET	ActiveX Data ObjectsNetwork (ActiveX Data ObjectsNetwork)	✓
2) What is Dataset object?	It is set to be collection of data with a tabular column representation. (It is set to be collection of data with a tabular column representation.)	✓
3) ADO.NET provides the communicator between	Dataset and the Data source. (Dataset and the Data source.)	✓
4) What is the use of Sql command object?	SqlCommand object allows user to interact with the database. (SqlCommand object allows user to interact with the database.)	✓
5) What is the use of Sql command object?	XML. (XML.)	✓
6) What will be the output of Round(3.7).	{6What69:given} ({6What69:correct})	{6What69:tick}
7) Does Java supports goto?	{7Does:given} ({7Does:correct})	{7Does:tick}
8) In JAVA can a dead thread be started again?	{8In71:given} ({8In71:correct})	{8In71:tick}
9) Is JDK required on each machine to run a Java program?	{9Is:given} ({9Is:correct})	{9Is:tick}
10) Which tool is required on each machine to run a Java program?	{10Which:given} ({10Which:correct})	{10Which:tick}
11) Is it possible to define a method in Java class but provide it is implementation in the code of another language like C?	{11Is:given} ({11Is:correct})	{11Is:tick}
12) Can a variable be local and static at the same time?	{12Can:given} ({12Can:correct})	{12Can:tick}
13) Can we have any other return type than void for main method in java class?	{13Can:given} ({13Can:correct})	{13Can:tick}
14) Which method of the Runnable interface that must be implemented by all threads?	{14Which:given} ({14Which:correct})	{14Which:tick}
15) Which Keyword is used If a class has multiple constructors defined,it's possible to call a constructor from another constructors body?	{15Which79:given} ({15Which79:correct})	{15Which79:tick}
16) Can we compare string and stringBuffer in Java?	{16Can80:given} ({16Can80:correct})	{16Can80:tick}
17) Can we cast any other type to		

13) Can we have any other return type than void for main method in java class?	{13Can:given} ({13Can:correct})	{13Can:tick}
14) Which method of the Runnable interface that must be implemented by all threads?	{14Which:given} ({14Which:correct})	{14Which:tick}
15) Which Keyword is used If a class has multiple constructors defined,it's possible to call a constructor from another constructors body?	{15Which79:given} ({15Which79:correct})	{15Which79:tick}
16) Can we compare string and stringBuffer in Java?	{16Can80:given} ({16Can80:correct})	{16Can80:tick}
17) Can we cast any other type to boolean type with type casting?	{17Can:given} ({17Can:correct})	{17Can:tick}
18) Base class for all exceptions	{18Base:given} ({18Base:correct})	{18Base:tick}
19) Environment variable that stores the location of bin folder	{19Environment:given} ({19Environment:correct})	{19Environment:tick}
